REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not teach the claimed stator winding arrangement including, inter alia, coil end portions of first, second and third armature windings projecting from slots in the axial direction of the stator core and arranged in a space facing a side face of the stator yoke portion by bending the projected coil end portions. The "space" is interpreted as being located: radially outside the space in which the coil end projections projecting axially from the slots are arranged (see applicants' Fig.1); or, in the linear motor embodiment (Fig.7), below the space in which the coil end projections projecting from the slots are arranged. In particular, Emery does not teach that the projected coil end portions shown in Figs.12&13 bend in the radial direction so that they face a side face of the stator yoke. The remaining prior art does not cure these deficiencies.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Burton S. Mullins whose telephone number is 305-7063. The examiner can normally be reached on Monday-Friday, 9 am to 5 pm. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-0956.
